Applications for 2020 and 2021 may use either the ASCA National Model third edition or the fourth edition templates and will be evaluated on the corresponding rubric. Applications for 2022 and beyond must use the fourth edition templates and will be evaluated based on the fourth edition rubric.

SECTION 1: VISION STATEMENT – 3 Points

The school counseling vision statement communicates what school counselors hope to see for students five to 15 years in the future. It aligns with the school and district vision statements (if available) and is informed by the school counseling program's beliefs.

The school counseling vision statement:

- Describes the future world where student outcomes are successfully achieved.
- States the best possible outcomes desired for all students that are five to 15 years away.
- Aligns with the school and district vision statement (if available*).

Include:

- The school counseling program's beliefs
- The school and/or district vision statements (if available*).

*If your school/district does not have a vision statement, indicate that in the narrative.

The narrative addresses:

- How the school counseling program's beliefs influenced the vision statement.
- How the vision statement was developed.
- How the vision statement drives the school counseling program.

The school counseling program goals define how the vision and mission are accomplished. They contribute to the development of school counseling core curriculum, closing-the-gap and small-group plans and address specific student outcomes.

The program goals:

- Promote achievement, attendance and/or behavior. Program goals are based on school data. There does not have to be a goal for each of the domains (academic, career, social/emotional) nor for all outcomes (achievement, attendance and behavior).
- Are based on school outcome data (see pages 24-35 of the “ASCA National Model Implementation Guide”).
- Address achievement, opportunity or attainment.
- Are written in SMART format: specific, measurable, attainable, results-oriented, time-bound.

Note: It’s encouraged but not required that one goal address a gap. This goal could then drive Section 11.

The narrative addresses how the goals:

- Were developed.
- Are based on school outcome data (school data profiles, school improvement plans, data analysis reports).
- Address student inequalities: achievement, opportunities, attainment, school improvement goals or schoolwide issues identified through data.

The weekly calendars include:

- Dates and as much specific information as possible and include delivery method (core curriculum-CC, small group-SG, individual-I).
- Specific topic addressed (e.g. bullying, peer relationships, postsecondary preparation) – see pages 104 and 105 of the “ASCA National Model Implementation Guide.”
